## Beat the Price Rise!

Producing a High Quality Amber Colloidal Silver is something that we have always strived for. Providing you the best product that we can, be it from the fully recyclable packaging or the renewable energy generated via our Solar Panel installation. We put effort and care into everything we do! After much deliberation and delay , We have taken the difficult decision to increase our prices across our whole range of bottles, effective from the 1st of December.

Fret not, the Standard Starter Kit is staying at its price of £39.95 so it'll retain it's position as being the best value for money!

Down below you'll find your 10% off discount codes which will allow you to bring the price down to roughly what they were before the price rise! Beat the price rise by using those discount codes today!

## Royal Mail Postal Updates

Due to the various Royal Mail strikes, Postage by standard methods have been delayed somewhat, with some of our customers reporting delivery times of 3 weeks or more! There are further strikes to come on the 1st, 9th, and 11th of December so parcels dispatched by Royal Mail will face delays.

As we are getting to the busiest time of the year for delivery services, please be aware that any parcels going by regular mail will likely face additional delays. As of this moment, courier services such as our DPD options are still a reliable way to receive your Colloidal Silver quickly and with full tracking! simply select the DPD delivery option at the checkout for a faster delivery service.

## Our Commitment to Recycling!

While lazily browsing the internet looking at Cat videos, Neil sent me this very interesting photo. Not many people take in to consideration how long common products take to decompose, the results are rather shocking if I do say so myself.

Take a standard plastic bottle, the type you might get at a supermarket for a bottle of Pop. 450 years that will take to properly decompose! UK Colloidal Laboratories has only been around for 23, and we shudder to think of how many bottles will outlast us into the future.

#### HOW LONG DOES IT TAKE TO DECOMPOSE?

PAPER TOWEL - 2-4 WEEKS  
BANANA PEEL - 3-4 WEEKS  
PAPER BAG - 1 MONTH  
NEWSPAPER - 1.5 MONTHS  
APPLE CORE - 2 MONTHS  
CARDBOARD - 2 MONTHS  
COTTON GLOVE - 3 MONTHS  
ORANGE PEELS - 6 MONTHS  
PLYWOOD - 1-3 YEARS  
WOOL SOCK - 1-5 YEARS  
MILK CARTONS - 5 YEARS  
CIGARETTE BUTTS - 10-12 YEARS  
LEATHER SHOES - 25-40 YEARS  
TINNED STEEL CAN - 50 YEARS  
FOAMED PLASTIC CUPS - 50 YEARS  
RUBBER-BOOT SOLE - 50-80 YEARS  
PLASTIC CONTAINERS - 50-80 YEARS  
ALUMINUM CAN - 200-500 YEARS  
PLASTIC BOTTLES - 450 YEARS  
DISPOSABLE DIAPERS - 550 YEARS  
MONOFILAMENT FISHING LINE - 600 YEARS  
PLASTIC BAGS - 200-1000 YEARS.

WE REQUEST YOU, PLEASE SHARE THIS PIECE OF INFORMATION IN YOUR NETWORK AS MUCH AS YOU CAN.

THIS WILL CREATE AWARENESS AMONGST PEOPLE THAT PLASTIC IS ONE OF THE MAJOR REASONS RELATED TO THE GLOBAL GREEN HOUSE EFFECT.

\*PLEASE SUPPORT A GREEN ENVIRONMENT\*.

It's reasons like this that motivate our family business to do better for you, for the environment, and for the generations of children after us. "But Joe, don't you yourself use Amber Plastic bottles?". Yes we do indeed, flip it upside down (with the lid still on!) and have a gander at the recycle logo with the '1' inside. All of the plastic we use is completely recyclable! the caps, the bottles, all of it! remember to put it in your recycling bins once you've used them to help keep our planet green :) The same also goes for the packaging. All cardboard and paper, and it easily decomposes within weeks! Now isn't that clever.

## Laugh of the Month!

**I help blind  
people,  
I give them  
independence**

**I protect people,  
I help them walk  
around without  
fear of criminals**

**I like
