Turkey Office

Neil & Max are still around but working part-time, mostly from Turkey where they have an office. They still come to the UK regularly, covering holidays and providing support to clients. Thanks to modern communications, they are both still available on his usual phone extension, taking calls & orders when needed.

Feefo Platinum Trusted Service Award

We are beyond thrilled to have received the Platinum Trusted Service Award from Feefo. If you didn't know, Feefo is a renowned Customer Review system that only allows people who have a verified purchase to write a comment, which makes it more reputable and secure than other review systems out there! We've received an average score of 4.9 stars out of 5, across 336 reviews, and can now post this as recognition of the team's effort and passion to provide the best Colloidal Silver, and top notch customer service on the market!

Platinum Trusted Service Award

Royal Mail Postal Updates

1/11/23 We have had several deliveries that have taken nearly 7 days to arrive with the 48 hour service.

We always include basic delivery in all purchases over £15 so that you have the choice to select the service you need. Please be aware at the this time of year.

**Our continued Commitment to our
Beautiful Planet**

As many of you may know, we currently support the Woodland Trust to help fund natural carbon capture, an excellent way to combat runaway climate change. This means that every time you purchase any bottle of Colloidal Silver from us, part of the profits go directly to the Woodland Trust to further help them plant more trees! This is just the start of our efforts to push Britain forwards to a cleaner era. If you'd like to further help the Woodland trust in their wonderful mission, please click the link below to learn more and consider donating as well!

Silver In the News

Silver-Based Gel with Amino Acids 100 Times More Effective than Conventional Silver Drugs:

As antibiotic drugs become less effective in fighting infections, typically due to overuse, remedies containing silver continue to show their promise. One of the latest entries comes from scientists at Tver State University who claim that their antibacterial gel combining silver and amino acids is 100 times more effective at killing germs than current silver-based drugs such as those used for burn wounds.

Writing in the *Journal of Materials Chemistry*, the researchers noted that the production of this gel is inexpensive and non-toxic, another plus for this discovery as current methods to produce nanoparticles of silver often involve using chemicals that linger in the silver's structure. In one experiment, they replaced these toxic precursors with sulfur amino acid, a substance found in humans. The amino acid reduces silver from its salts – silver nitrate, for example – yielding a gel that kept the silver structure intact.

The gel has been tested in the laboratory on a group of drug-resistant bacteria including *Staphylococcus* (commonly called 'Staph'), *Pseudomonas aeruginosa* (which causes pneumonia) and *Enterobacter*, which is very difficult to treat and can lead to dangerous conditions such as urinary tract infections (UTI), respiratory infections, and endocarditis (inflammation of heart tissues). These infections are often seen among hospital patients who were infected during their stay. "Our technology is simple, non-toxic and cheap enough to be easily scaled up," said head of the project Dmitry Vishnevetskii, associate Professor in the Department of physical chemistry at Tver State University, in a prepared statement.
